Molecular Functions
actin filament binding
actin binding
ankyrin binding
structural constituent of cytoskeleton
SMAD binding
transforming growth factor beta binding
nuclear androgen receptor binding
electron transfer activity
heparin binding
sulfur compound binding
glycosaminoglycan binding
integrin binding
cell adhesion molecule binding
tubulin binding
microtubule binding
haptoglobin binding
oxygen carrier activity
oxygen binding
NAD binding
small GTPase binding
GTPase binding
myosin binding
molecular function inhibitor activity
flavin adenine dinucleotide binding
acyl−CoA dehydrogenase activity
protein−macromolecule adaptor activity
protein C−terminus binding
molecular adaptor activity
chondroitin sulfate binding
transmembrane transporter binding
