Molecular Functions
cis−trans isomerase activity
peptidyl−prolyl cis−trans isomerase activity
isomerase activity
oxidoreductase activity, acting on diphenols and related substances as donors
ubiquinol−cytochrome−c reductase activity
electron transfer activity
oxidoreduction−driven active transmembrane transporter activity
active transmembrane transporter activity
active ion transmembrane transporter activity
oxidoreductase activity, acting on a heme group of donors
primary active transmembrane transporter activity
cytochrome−c oxidase activity
proton transmembrane transporter activity
proton channel activity
proton−transporting ATP synthase activity, rotational mechanism
MDM2/MDM4 family protein binding
ubiquitin−protein transferase inhibitor activity
ubiquitin ligase inhibitor activity
ubiquitin−protein transferase regulator activity
structural constituent of ribosome
structural molecule activity
rRNA binding
RNA binding
