Molecular Functions
transcription coregulator activity
actin binding
histone binding
structural constituent of ribosome
phosphatase binding
RNA polymerase II−specific DNA−binding transcription factor binding
ribonucleoprotein complex binding
protein C−terminus binding
transcription coactivator activity
ubiquitin−like protein transferase activity
GTP binding
guanyl nucleotide binding
guanyl ribonucleotide binding
GTPase binding
protein phosphatase binding
ubiquitin protein ligase binding
ubiquitin−like protein ligase binding
small GTPase binding
actin filament binding
GTPase regulator activity
