Molecular Functions
glycosaminoglycan binding
heparin binding
sulfur compound binding
ligand−gated ion channel activity
ligand−gated cation channel activity
gated channel activity
sodium channel regulator activity
number of genes
50
100
150
p.adjust
0.03
0.02
0.01
transmembrane signaling receptor activity
signaling receptor activity
molecular transducer activity
actin filament binding
adenyl ribonucleotide binding
carbohydrate derivative binding
cell adhesion molecule binding
integrin binding
