Molecular Functions
guanyl ribonucleotide binding
nucleoside−triphosphatase regulator activity
actin binding
guanyl nucleotide binding
GTPase regulator activity
GTP binding
actin filament binding
acyltransferase activity
acyltransferase activity, transferring groups other than amino−acyl groups
ubiquitin−protein transferase activity
protein phosphatase regulator activity
nucleosome binding
ubiquitin−like protein transferase activity
RNA polymerase II−specific DNA−binding transcription factor binding
protein phosphatase binding
protein C−terminus binding
mRNA binding
phosphatase binding
ubiquitin protein ligase binding
ubiquitin−like protein ligase binding
protein N−terminus binding
transcription coactivator activity
transcription coregulator activity
magnesium ion binding
structural constituent of ribosome
histone binding
ribosome binding
ribonucleoprotein complex binding
small GTPase binding
GTPase binding
