Molecular Functions
haptoglobin binding
SMAD binding
oxygen carrier activity
transmembrane transporter binding
sequence−specific mRNA binding
RNA polymerase II−specific DNA−binding transcription factor binding
peroxidase activity
oxidoreductase activity, acting on peroxide as acceptor
phospholipid binding
actinin binding
protein methyltransferase activity
N−methyltransferase activity
cell adhesion molecule binding
oxygen binding
RNA helicase activity
sulfur compound binding
ATP−dependent activity, acting on RNA
DNA−binding transcription repressor activity, RNA polymerase II−specific
DNA−binding transcription repressor activity
alpha−actinin binding
