Molecular Functions
mRNA 3'−UTR binding
calcium channel regulator activity
sequence−specific mRNA binding
histone−lysine N−methyltransferase activity
ion channel regulator activity
channel regulator activity
transmembrane transporter binding
lysine N−methyltransferase activity
protein−lysine N−methyltransferase activity
histone methyltransferase activity
R−SMAD binding
molecular function inhibitor activity
alpha−actinin binding
ion channel inhibitor activity
transcription coactivator activity
RNA helicase activity
channel inhibitor activity
ATP−dependent activity, acting on RNA
pre−mRNA binding
potassium channel inhibitor activity
