Molecular Functions
actin binding
protein serine/threonine kinase activity
transcription coregulator activity
molecular adaptor activity
RNA polymerase II−specific DNA−binding transcription factor binding
actin filament binding
protein C−terminus binding
nuclear receptor binding
protein−macromolecule adaptor activity
tubulin binding
mRNA binding
alpha−actinin binding
cell adhesion molecule binding
transmembrane transporter binding
transcription coactivator activity
helicase activity
protein kinase A binding
histone binding
SMAD binding
actinin binding
