Molecular Functions
actin binding
mRNA binding
2 iron, 2 sulfur cluster binding
ribonucleoprotein complex binding
transcription coregulator activity
ion channel inhibitor activity
channel inhibitor activity
potassium channel inhibitor activity
ion channel regulator activity
iron−sulfur cluster binding
metal cluster binding
electron transfer activity
channel regulator activity
mRNA 3'−UTR binding
molecular function inhibitor activity
dynein complex binding
ubiquitin−like protein transferase activity
ubiquitin−like protein ligase binding
NADH dehydrogenase activity
ubiquitin protein ligase binding
