negative regulation of protein localization

energy derivation by oxidation of organic compounds cellular respiration purine–containing compound metabolic process purine nucleotide metabolic process nucleotide metabolic process nucleotide metabolic process nucleoside phosphate metabolic process nucleoside phosphate metabolic process nucleoside phosphate metabolic process	number of genes
ribose phosphate metabolic process gurine ribonucleotide metabolic process ATP metabolic process ribonucleotide metabolic process nucleoside diphosphate metabolic process pyruvate metabolic process ATP generation from ADP glycolytic process	Definition of genes 0
muscle tissue development NAD metabolic process	

regulation of cellular response to growth factor stimulus

regulation of transmembrane receptor protein serine/threonine kinase signaling pathway

positive regulation of cell projection organization

transforming growth factor beta receptor signaling pathway

transmembrane receptor protein serine/threonine kinase signaling pathway
