Molecular Functions
haptoglobin binding
transcription coregulator activity
oxygen carrier activity
Hsp70 protein binding
RNA helicase activity
ATP−dependent activity, acting on RNA
mRNA 3'−UTR binding
ubiquitin protein ligase binding
chromatin DNA binding
transmembrane transporter binding
mRNA binding
ubiquitin−like protein ligase binding
RNA polymerase II−specific DNA−binding transcription factor binding
helicase activity
potassium channel inhibitor activity
iron−sulfur cluster binding
metal cluster binding
calmodulin binding
single−stranded RNA binding
oxygen binding
