Molecular Functions
actin binding
transcription coregulator activity
protein serine/threonine kinase activity
molecular adaptor activity
transmembrane transporter binding
actin filament binding
cell adhesion molecule binding
protein−macromolecule adaptor activity
protein C−terminus binding
RNA polymerase II−specific DNA−binding transcription factor binding
transcription coactivator activity
SMAD binding
GTPase regulator activity
nucleoside−triphosphatase regulator activity
tubulin binding
ubiquitin−like protein ligase binding
ubiquitin protein ligase binding
microtubule plus−end binding
nuclear receptor binding
mRNA binding
