Biological Processes

neuron fate commitment	
positive regulation of vascular endothelial growth factor receptor signaling pathway	
negative regulation of glial cell differentiation	
vascular endothelial growth factor receptor signaling pathway	on the clied colleged to the colors
	epithelial cell-cell adhesion
regulation of vascular endothelial growth factor receptor signaling pathway epithelial tube branching involved in lung morphogenesis	
development of primary sexual characteristics stem cell proliferation	
endothelial cell proliferation regulation of stem cell proliferation	
gonad development	
	cytoplasmic translation
epithelial cell proliferation	
regulation of cell development	
regulation of nervous system development	
positive regulation of molecular function	
positive-regulation of cellular component organ	nization
positive regulation of catalytic activity	
programmed cell d	death
locomotion	
movement of cell or subcellular component positive regulation of locomotion	
positive regulation of cell migration localization of cell apoptotic proces	S
cell-motility	
regulation of locomotion	
positive regulation of cell-motility cell migration
