Biological Processes

regulation of cell growth

oxidative phosphorylation

generation of precursor metabolites and energy

aerobic respiration

energy derivation by oxidation of organic compounds

cellular respiration

ribosomal large subunit biogenesis
ribosomal large subunit biogenesis
ribosomal large subunit biogenesis
ribosomal large subunit biogenesis
ribosomal small subunit assembly

number of genes

O 20

) 50

cytoplasmic translation

regulation of heart contraction striated muscle-tissue development cardiac chamber development

heart process cardiac muscle-tissue development

regulation of the force of heart contraction muscle contraction

muscle contraction

muscle system process

muscle cell_differentiation
